Battery Upgrade Kit Installation Instructions

This guide provides instructions for removing the existing battery harness assembly and replacing it with the new upgrade kit (KT-120840-10 or -50). The kit consists of a wiring harness and battery.

Remove Existing Battery Harness

1. Remove screw from screw hole.
2. Slide the battery cover toward the bottom of the handle and then lift.

3. Lift battery out of the battery well.
4. Remove the black rubber pad from the battery compartment.

5. Press in the two retaining tabs on both sides of the connector mounting bracket and lift out of the handle.

6. Disconnect the harness connector from the printed circuit board (PCB) connector.

7. Properly discard the old battery and harness assembly.

Install the New Battery Upgrade Kit

Wiring Harness

Battery

To install the new wiring harness:

1. Align the wiring harness connector with the connector on the PCB.

✓ **NOTE** The harness connector is keyed. Ensure that the rib on the connector is facing up.

2. Push the wiring harness connector into the PCB connector. Use a plastic tool to ensure that the harness connector is fully mated with the PCB connector.
3. Ensure all wires stay below the plastic ridges.

- Spread the wires near the connector mounting bracket so that they form a loop around the screw boss when installed. Group the black, blue, light orange and green wires together and the white, dark orange, yellow, brown wires together.

- Slide the harness over the screw boss and align the connector mounting bracket alignment channel with the tab on the handle.
- Push the connector mounting bracket down until it snaps into place.
- Ensure that the wires are spread over the screw boss.
- Replace the black rubber pad into the compartment ensuring that it is lying flat along the bottom of the compartment, with its smoother side facing up, and the rubber "fingers" straddling the screw boss.

To install the new battery:

- Place the battery, rounded side down, in the compartment ensuring that the black rubber pad stays in position. Using a needle nose pliers or tweezers (if necessary), guide the battery cable connector into the female battery connector on the connector mounting bracket.

2. Place the battery wires around the screw boss so that they do not interfere when installing the battery cover.
3. Place the wire latch down until just below the top of the screw boss.

4. Place the battery cover onto the handle and slide it toward the top of the device.

5. Inspect the position of the battery cover with the main housing. Ensure that the battery door is properly positioned by ensuring that the seam between the door and the handle is uniform. If the door is misaligned, remove battery and black rubber pad and re-install.

6. Secure the battery cover with the Torx screw using a T8 Torx drive.
7. After installing a new battery, wait approximately one minute before inserting the mobile computer into a cradle.

Waste Electrical and Electronic Equipment (WEEE)

English: For EU Customers: All products at the end of their life must be returned to Zebra for recycling. For information on how to return product, please go to: <http://www.zebra.com/weee>.

Français: Clients de l'Union Européenne : Tous les produits en fin de cycle de vie doivent être retournés à Zebra pour recyclage. Pour de plus amples informations sur le retour de produits, consultez : <http://www.zebra.com/weee>.
