WORKABOUT PRO3 PISTOL GRIP WA6103 INSTALLATION GUIDE

Introduction

⚠️ **WARNING!** **The installation of this accessory must be performed using the appropriate anti-static devices. If unavailable, discharge static from your body by touching a grounded metallic object before opening any covers on the unit.**

The Pistol Grip kit, model WA6103, is intended for use with WORKABOUT PRO3 and previous G2 units (models 7527C and 7527S) which have a backplate incorporating a switch.

Installation

⚠️ **IMPORTANT** Back up any data in RAM first, since it will be erased when the internal power of the WORKABOUT PRO3 is turned off.

1. If your unit is using AC power, disconnect it.

2. Remove the battery pack cover and battery.

3. Remove the screw-on cap, if present, from the switch in the middle of the backplate.
