Power LED		No spare battery in slot; Spare battery not placed correctly.
Solid Red		Spare battery is charging.
Solid Green		Spare battery charging is complete.

4-Slot Battery Charger (Optional)

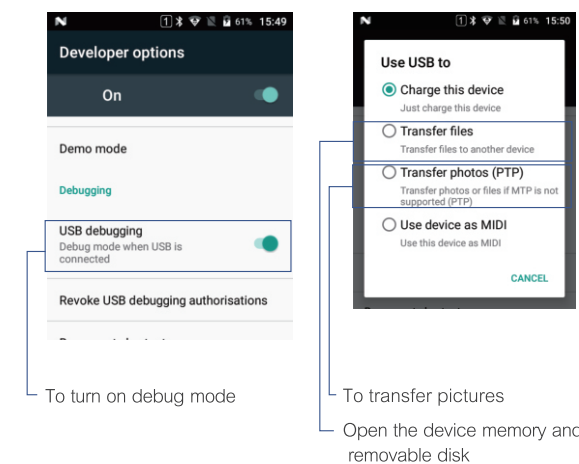

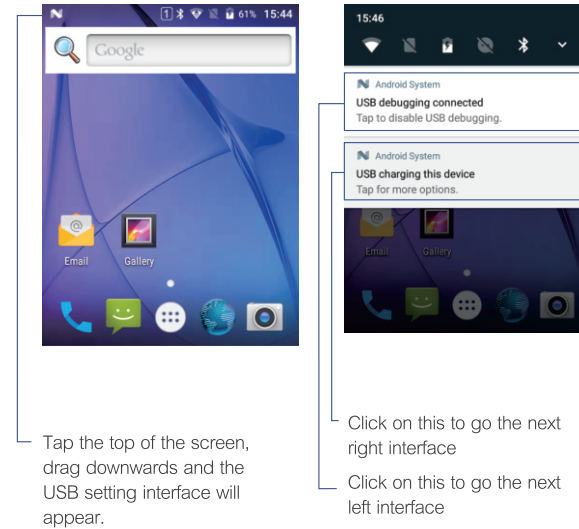

- Simultaneously charges up to 4 batteries

Lanyard (Optional)

Connecting to PC

After you install the Android driver or an Android smart phone assistant, you can connect the devices to your PC with USB cable provided. After device connected to your PC, the screen would display like this:

Device Care & Maintenance

Read all information before using the device to ensure safe and proper operation. Following are the warning information provided below to prevent incidents such as fire or explosion.

Warning

- Using unapproved power source, charger or battery may cause fire, explosion or other risks.
- Please use the accessories approved by manufacturer and corresponding to this model.
- Please charge device by standard charger of the manufacturer. Using other chargers may cause electrical leakage, fire, or damage to equipment and chargers.
- If charging is completed, remove the charger from the device and unplug the charger from the power outlet. Do not charge more than 12 hours.
- Do not expose to physical impact or damage.
- Do not use outdoor during a thunderstorm.
- Turn off the device before storage to prevent the battery to be completely drained.
- Do not expose to high temperatures, battery overheating may cause an explosion.
- Do not use the battery if the battery appears discoloration, deformation, abnormal heating, expansion and other phenomena.
- Stop using and disconnect all connections to other devices or cables before cleaning and maintaining the equipment.
- Do not touch the device with wet hands. Also, do not use the device in humid environments, such as rest rooms, or during water-base activities, such as swimming.
- It is recommended to use your device at temperature between 5 ~35°C (41~95°F) .
- Do not store the device near or in heaters, microwave, cooking equipment, or high pressure containers.
- Keep the device dry.
- Do not use the device in the environment of potential explosion risk (including the gas station, below the deck of the ship, near the transportation or storage facilities of fuel or chemicals, and the area in the air containing chemicals or grains, metal powder and other particles).

CAUTION!

- To ensure the unit working properly, please keep all connectors away from the contaminants staying inside of them such as dust, grease, mud, and water. The negligence may cause the unit with no communication, short circuited, overheated and so on.
- If the connector is damaged, please ensure the connector is being fully repaired before using the unit to avoid causing short circuited.
